Our environmental commitment

Our environmental commitment began in 1991 with the publication of a first environmental data analysis.

Since then we have made a concerted effort to continuously develop and increase our environmental efforts. Energy efficiency, reduction of CO2 emissions, use of FSC certified paper and the reduction in the use of solvents are key aspects that we focus on.

Every day the Mohn media team places the know-how and experience they have gained in nearly 20 years of environmental print production at the service of our customers. On top of that we invest in environmentally friendly technology.
